JTD Jitterbug® 2.0™

The Arbogast Jointed Jitterbug is an iconic lure. The Jointed Jitterbug 2.0 builds upon that legacy. A lower pull-point ensures an intense action in the water, which leads to more heart-stopping blowups. Updated hook hangers allow free movement of hooks to not slow down forward momentum, while the black-nickel finish hides them from the wary eyes of the fish you're targeting. The feathered rear treble drifts when the lure is stopped for extra strike-inducing movement.

Hula Popper[®] 2.0[™]

At first glance, everything about this model seems different than the original Hula Popper. However, that couldn't be further from the truth. We've molded the same 1948 shape as the original, made sure it has the same classic popping action, and most importantly you still get the heart-stopping strikes that Hula Popper fanatics have been going nuts about since the beginning. Upgrades you will find are the hook hangers, HD crackle patterns and the feathered treble.

Hula Popper[®]

There is nothing more exciting to topwater anglers than having a big bass explode on a Hula Popper. For more than 70 years anglers have said the Hula Popper, with its pulsating skirt, is their insurance when all else fails – morning, noon and night. The Arbogast Hula Popper is deadly when popped over submerged timber, weeds or grass beds. It gives every big fish within listening distance a real wake-up call they will never forget, and a fishing trip every Hula Popper angler will long remember!

Buzz Plug™

The Buzz Plug is a unique floating buzzbait that allows you to pause near structure to tease fish into striking. When paused, the front blade portion rises out of the water and positions the hooks just right to provide a sure hook-set. When retrieved at a constant pace, the Buzz Plug produces a wobble. It also can be worked like a twitch bait. The upturned double hook makes the Buzz Plug nearly weedless.

Buzz Plug Jr™

The Buzz Plug Jr. is a downsized version of the original Buzz Plug. At 2 3/8-inches and 5/8-ounce, the Buzz Plug Jr. is bite-sized temptation for gamefish lurking near structure. The Buzz Plug Jr. is a combination of a buzzbait and topwater lure. It can be burned across the surface, which causes the front blade to violently churn the surface and leave a fish-attracting wake. It can also be slowly twitched and during pauses, the front blade lifts out of the water and puts the double upturned hooks into prime position for a strike.

Jitterbug®

Well respected as THE topwater lure for night fishing, the Jitterbug has also proven its power to ignite explosive strikes throughout the day. Fred Arbogast's Jitterbug was first introduced in 1937. The Jitterbug has a double-cupped lip. Placed at the perfect angle, it produces a loud, rhythmic, surface-busting sound, proven to be irresistible to every known surface feeding fish ... especially bass.

Jointed Jitterbug®

Take the surface-busting sound created by the special lip on the Jitterbug and add the action of the tail-wagging Jointed Jitterbug and anglers have the most action-packed topwater lure available today. The motion of the jointed tail creates extra flash from the frantic swinging of the lure's bright plated treble hooks. Jointed Jitterbugs can be fished slowly to produce a rhythmic plopping sound or faster to create a wild surface commotion.
